

In the Claims:Claim 1 (currently amended):

- 1 1. A tool holder for holding a plurality of tools, comprising:
- 2 a plurality of holding portions, each for holding a tool with a specification; and
- 3 a plurality of specification marking members, each of said specification marking members
- 4 being respectively integral with a holding portion for showing the specification of the tool
- 5 to be held thereon;
- 6 wherein each of said specification marking members comprises a retaining portion and a
- 7 marking portion, said retaining portion extends directly from said holding portion, and a said
- 8 marking portion is removably retained in said retaining portion
- 9 further wherein said retaining portions are movable relative to each other.

Claim 2 (previously amended):

- 1 2. The tool holder as defined in claim 1, wherein said retaining portion is provided in an upper
- 2 face with a first locating element; wherein said marking portion is provided in an under face
- 3 with a second locating element and said marking portion is removably located in said
- 4 retaining portion in such a manner that said second locating element of said marking portion
- 5 is separably engaged with said first locating element of said retaining portion.

Claim 3 (previously amended):

- 1 3. The tool holder as defined in claim 2, wherein said first locating element of said retaining
- 2 portion is in the form of a protrusion, and said second locating element of said marking
